Site is

Generally Flat land w/ structures near water.

Site involves a 'Swirling, roiling, billowing substance that is  
volcanic, extensive, and encompassing. Various temperatures are manifest  
here, as well as some relatively noxious/chemical smells; site seems  
to involve extensive fire + flames, producing smoke smells, chaining  
+ sooty faeces. No people are perceived here. Structures seem  
to be secondary to the site, or even irrelevant.
